

Entrepreneurs Rising with Ambition And Growth

The Women Thrive in Bangladesh Activity, funded by USAID and PVH and implemented by CARE Bangladesh, provides business education training to enhance the knowledge and skills of informal women workers in business and entrepreneurship. Over three days of training, these women learned about various aspects of identifying a profitable business and how to operate it. Topics included business basics, planning, promotion, and marketing. This initiative benefited 180 women in 2023, who are now successfully managing small-scale businesses in their community. Let's meet these inspiring women who dream of becoming entrepreneurs.
